It may be late, but this is disgraceful.

People & broader community should have a voice before our scenic areas are destroyed for no benefit to community. This beach is one of the most beautiful areas in the county or country & is getting destroyed without proper notification to the community or public at large. For an oyster farm that will destroy the natural function of the inlet & the beauty that every tourist landing into that airstrip saw from above! I take a video of the beautiful wild surroundings every time I land. The airport approach has won awards online for beauty last year & yet this travesty was allowed to happen at #carrickfin Donegal? #SaveOurStrand

The locals protected this area for generations & now one minister has the right to steal it from us? No. The environmental study on sensitive ocean inlet should have been mandatory!

Natural resource being destroyed by a TD living in cork who could care less about Donegal - obviously for him its all about the greasy handshakes.
The people are getting angry. -at home & abroad - believe me!
