A Chara,

I would like to propose that every household and business within a 20km radius of the shoreline be informed by post of all proposed shellfish operations.

My neighbours and I living in Dublin were notified by post of the proposed luas tram lines intended for our area. We were given free post postcards on which we could indicate a preference of two different streets. As a result we chose the one most suitable for the area.

Surely citizens of the state living in coastal areas are entitled to be informed in a similar manner of any proposed developments occurring on their doorstep.

Is mise le meas,

Mairead Ni Dhonail.
