"Public Consultation Independent Review of Aquaculture Licensing process" I wish to make the following submission

I was born and lived in Tanad for many years of my life. Like many of my age I had to emigrate to England in search of work. Having returned home it is now pleasing to see young people being able to find employment at home

Marine Harvest have filled that vacuum in our parish. It is exciting for me to watch containers of Salmon leaving Tanad each day to travel to the continent this is the result of the employment provided by Marine Harvest.

Those who are objecting to the granting of licences for extensions of farming had not to emigrate, most are strangers, "Blow Ins" in our parish and offer nothing to us. They live in luxurious mansions and object to any developments. So I ask the Department of the Marine to issue licences to Fish Farming Companies so more employment can be created in Rural Areas

Sally McLaughlin
